Business, Financials,
Coding

STRENGTHS & ASSETS

- Full-Stack code, experience in projects, teamwork skills, order and organization, communication skills, good values (respect, patience), problem solving, speaking skills, agile methods
- Interdisciplinary and international team
- Efficient and disciplined

COMMON GOALS

Researching and developing a profitable solution to a problem that many people have

PERSONAL GOALS

Learn new technologies, learn new things from others, learn teamwork skills and learn to adapt to various situations

PURPOSE

Resolve problems

VALUES

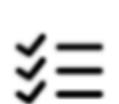

People first
Respect each other, always give an space to share and talk
Communication is the most important thing

NEEDS & EXPECTATIONS

Complete the tasks and work every week, trying to progress on something
Solve the problems and issues on the way

RULES & ACTIVITIES

Have a chat group and communicate dates, issues or problems

Anyone has to be informed about the progress of the group/project

Meetings are current

All the decisions have to be known by each member, and the majority agree with

We can use specific technologies that help the progress of the team/project

Sprint Planning & Retro Planning every Friday 14:30

STRENGTHS & ASSETS

WEAKNESSES & RISKS

Uncertainty in ability and performance of each team member
